Conclusion

01

Introduction

Introduction

Overview of the Problem:

- Lease agreements often contain legal jargon and lengthy clauses, leading to confusion.
- Students face challenges in understanding their rights and responsibilities.
- Landlords need a streamlined way to explain key terms without misinterpretation.

Unique Value Proposition:

- Combines natural language processing with AI-driven tools to simplify lease agreements.
- Offers tailored advice based on user queries, ensuring clarity and accuracy.

02

Objectives

Objective

Goal Statement:

"Develop an AI-powered chatbot to navigate and explain lease agreements easily."

Reduce the need for external legal consultation for basic lease clarification.

03

Application Workflow

Application Workflow

Process Diagram :

Enhanced Explanation:

Add annotations to the diagram explaining each stage.

Highlight real-world scenarios, e.g., "What does the security deposit clause mean?"

04

Architecture

Architecture

Frontend

- Built with Streamlit for an intuitive and responsive interface.
- Offers a clean design prioritizing user experience.

Backend

- Text processing powered by LangChain.
- Embedding creation using OpenAI and HuggingFace.
- Vector storage and retrieval using FAISS/Pinecone for rapid response.

Data Flow

- Lease documents converted into embeddings for efficient search and retrieval.
- Context-based responses generated dynamically.

Key ideas in market opportunity

Research new markets

Analyze existing customer needs and identify gaps in the market to find new opportunities

Innovative solutions

Utilize technology and customer feedback to come up with novel solutions that meet your customer's demands or needs

Stay ahead of trends

Monitor changes in the marketplace, such as shifts in consumer behavior or emerging technologies, to stay competitive and capitalize on new opportunities and trends

Seasonal spikes

Identify times of year when demand for certain products may spike, such as holidays or special occasions, and use these times to target customers or maximize sales

Revenue by quarter

Roadmap infographic

Initiative	Objective	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Understanding	Analyze and understand the needs of your target audience												
Conduct research	Research existing products in the industry and analyze how successful they are												
Brainstorm ideas	Generate ideas based on user feedback and research findings												
Develop a prototype	Create a basic version of the product to show investors												
Test for usability	Put the prototype through rigorous testing processes to ensure that it meets user requirements												
Analyze feedback	Analyze feedback												

KPI dashboard

KPI	Current Value	Target Value
User satisfaction	4.5/5	>4.5/5
Response time	2.3 seconds	<3 seconds
Error rate	0.8%	<1%
Conversation rate	15%	>20%
Retention rate	80%	>75%
Feedback ratings	4.7/5	>4.5/5
